

Course Overview

DAN Total Instructor Pkg.

Program #PRO.007

A program designed to introduce the scuba experience to non-certified participants meeting minimum age and health requirements. This may be conducted in a pool or confined water, and if certain conditions are met, may be expanded to include an actual open water dive.

You will watch a short video in a casual atmosphere in our classroom. Our professional staff will answer all your questions, discuss some key safety points and fit you up with all the necessary equipment. Then were off to the pool where the staff will guide you through this new underwater experience at your pace. Find out what you've been missing.
