

## TRAINING Recreational

### LIFETIME LEARNING PASS Recreational Programs

Welcome to the Indian Valley Scuba all-inclusive lifetime diver continuing education program, the IVS exclusive Lifetime Learning Pass. This unique opportunity, available only at Indian Valley Scuba, provides divers the opportunity to pursue as many qualifying specialty and advanced diver education programs as they wish, throughout their diving career! We offer this program in two versions, Recreational and Technical, so there is a perfect fit for everyone. This is the ultimate diver education program for the ultimate diver - all at one fixed price!

### RECREATIONAL MODULE

Divers from any agency and certification level are welcome to join in this comprehensive program, provided the necessary prerequisites are met. Indian Valley Scuba offers training through all major training organizations. Our IVS exclusive training programs typically combine two or more agency course requirements, allowing the participant to earn multiple certifications for successful completion. The certifications offered for each program are listed on the IVS website. Take as many or as few classes as you wish, whenever you wish, for the rest of your life! Over thirty specialty and advanced training programs are included in this program, all for one great price!

Some courses have minimum age or prerequisite certification level requirements, and these must be observed for each participant. For classroom and in-house workshop sessions, all specialty equipment, tools, fixtures, handouts, and software needed for classroom & workshop sessions are provided for student use. Students are responsible for the cost of textbooks, student manuals, and agency certification fees for each course selected.

For classes involving in-water sessions, divers must provide their own personal equipment. Details for required gear configurations for each program can be found on the Indian Valley Scuba website. Additional equipment, such as digital underwater cameras, scooters, tools, reels, lift bags, rebreathers, stage bottles & double tank setups, may be required for a number of the specialty programs for pool sessions & open water dives. These items are available for rental at Indian Valley Scuba for a nominal fee. Costs for air fills, tank rentals, gases for mixed gas programs, and consumables are not included in the course fee.
